

# DVD player compatibility

The Apple SuperDrive writes to DVD-R 4.7 gigabyte General Use media. These discs are playable in most standard DVD players and computer DVD-ROM drives. The following table lists players that we have specifically tested for playability. If your player is not on the list, that does not mean it is not compatible, only that we have not tested it yet.

This list is updated regularly, so check back if you don't see your particular model here.

Player make/model	Plays DVD-R	Player make/model	Plays DVD-R
